Standard Electric Slot
Punch (110V) - Foot switch
and adjustable centering guides
Slot Size: $\frac{1}{8} \times \frac{9}{16}$ " (3 x 14mm)

Film-Based Photo ID Systems & Cameras

All-Photo

A. 3300-1000

ID-200 Hand-Held All-Photo ID Camera - This portable camera operates manually and includes both a removable battery-operated flash and pistol grip. Its twin-imaging capability produces two high-quality, "full-right" all-photo ID cards in color or B&W. It is equipped with a fixed-distance view finder, subject framing capability, exposure adjustment, and tripod socket.

Note: Requires pre-printed data cards.

B. 3320-9015*

Polaroid Horizontal Format ID-100 System (110V) - Includes camera, base, photo die cutter, laminator, and is designed for table-top operation. It features a built-in flash and a sophisticated LED indicator panel that outlines step-by-step operation and eliminates procedural errors. The ID-100 produces two high-quality ID cards of the same individual or one each of two separate people in either color or B&W. Camera head folds back against stand for storage and portability.

*Also available:

3320-9010 - Vertical Format

Passport

C. 3305-2000

M-200 Hand-Held Passport Camera - Self-cocking shutter, view finder, hot shoe, X-sync, tripod socket, and pistol grip. This Passport/ID Camera is ideal where space is limited for operation and storage. Built-in view finder graphics help determine correct head size for passport or photo ID; two images per sheet of film. Compact and efficient, a great value. (Flash sold separately - **3946-1000**)

Composite

D. 3310-4050*

ID40 SX 4-Lens Automatic Photo ID Camera (110V) - Features built-in flash, aiming light, variable output strobe, memory, and an LED panel that outlines step-by-step operation and eliminates procedural errors. Produces one photo of four different people, two identical photos of two people, or four identical photos of the same person. This is our most economical 4-lens camera. (Stand sold separately - **3910-1400**)

*Also available:

3310-4052 - 220 Volt

Call for availability on 3310-4052.

Polaroid Film

E. 4220-6000

Polaroid® ID-UV ID Film - A medium-speed, medium-contrast, medium-grain, daylight, electronic flash, balanced color, paper-based print film with security pattern that is visible under ultraviolet light. (Twin pack, 20 exposures) PID# 625854

F. 4220-3000

Polaroid® ER Type 669 Color Film - A medium-speed, medium-contrast, medium-grain, general-purpose, paper-based print film. It provides excellent results in a wide variety of applications, and is particularly suitable for Image Transfer and Emulsion Lift. It has a soft, flattering color palette and an extended dynamic range. (Twin pack, 20 exposures) PID# 623960

Note: We offer many other types of Polaroid Film, including both sheet and pack film. Call for availability and pricing.

(68 x 111mm)

*Also available:

1840-5017 - Horizontal/Top Load

Proximity Cards

require special care and protection because of the high-tech nature of their design and their high cost-per-card. When used with strap clips or other strap attachments, the straps thread through the slots in the holder effectively "locking" the card into the holder.

D. 1840-5060*
Vertical Top-Load Proximity Card Badge Holder with Slot/Chain Holes - Clear vinyl, badge strap clip "locks in" card

Size: Credit Card
Max. Card: 2¹/₈ x 3³/₈" (54 x 86mm)

Magnetic Badge Holders

To avoid damage to clothing, Magnetic Badge Holders feature two magnets. One is sealed into the front portion of the holder and one in the back. Most often attached to a breast pocket or around a belt, Magnetic Badge Holders are versatile, popular, and extremely professional in appearance.

Clips and Pins

Pressure-Sensitive and Glue-On Clips and Pins attach to metal or plastic ID cards, badges, and other promotional products. Pressure-Sensitive products are ready-to-use, easy-to-apply, and feature long-term bonding characteristics. Glue-On products require an adhesive applied to the ABS base for permanent bonding.

Lanyard and Wristwear Guidelines

Dye-Sublimation

(OptiKOLOR™, Classic™ Line)

Up to Five Colors on Color Material or Six Colors on White Material

- Premium quality... durable and long lasting
- Perfect for intricate logos and detailed artwork
- Any Pantone (PMS) color ink available on 3/8", 5/8", 3/4", and 1" lanyards
- Standard two-sided printing

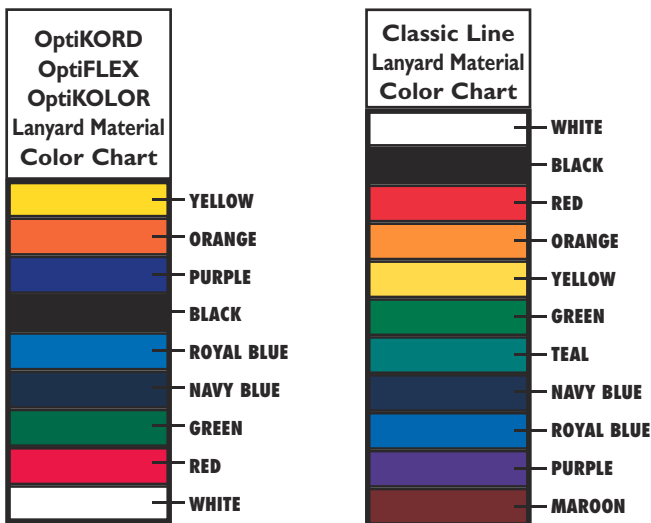

Notes: The appearance of the Pantone (PMS) color inks may vary when custom-printed.

Screen-Printing

(OptiKORD™, OptiFLEX™, OptiKOLOR™, Classic™ Line)

Any One PMS Color on Standard Material

- Superior quality... quick turn-around for small and large orders
- Any one Pantone (PMS) color ink on 3/8", 5/8", 3/4", 7/16", and 1" lanyards - each side can be a different color
- One or two-sided printing available - consider using different imprints on each side
- Best suited for straight text and simple logos

Notes: The appearance of the Pantone (PMS) color inks may vary based on the actual color of the lanyard material.

Due to the nature of this printing process, there are limitations with certain color combinations and image resolution. Your account executive can assist you with any questions.

Hot Stamping

One Color or Two Colors (Side-by-Side Printing) on Standard Material

- Good quality... perfect choice for limited budgets
- Best suited for straight text
- Great for give-aways and promotions
- Available in color combinations shown below – multi-color imprints available as well
- One or two-sided printing available on 3/8", 5/8", 3/4", and 1" lanyards – consider different images or imprint colors on each side

Imprint Colors (on Standard Lanyard Material)
