Novus more space system

NOVUS[®]

Innovations on track: With expertise in individually tailored retail solutions.

Since the company was founded in 1949, the Novus brand has been synonymous with:

- innovative technology,
- sophisticated „German Engineering“,
- modular systems
- and high quality.

These attributes provide the basis for the modular Novus RetailSystem as the key to creating secure and appealing POS solutions that are tailored to your needs with its versatile, flexible elements. It is precisely this individuality that is needed at the checkout with its many and varied demands.

Our space-saving flexible products integrate perfectly into the shop's design and enhance user friendliness at the checkout with cleverly designed details.

Every day our engineers are busy working on new solutions at the Research and Development Centre at company headquarters in Lingen, Germany. We use advanced technology in our company's own production facilities to ensure the high quality of our products.

Let our expertise benefit your business:
We can design and produce solutions for you that are tailored in every detail to your specific requirements.

The emco Group's Research and Development Centre in Lingen, Germany

One system – multi-purpose use

Mobile service perfectly integrated at the Point of Sale: NOVUS TabletSafe.

The TabletSafe adds a practical and versatile tablet holder to the NOVUS RetailSystem range. Product and promotional information presented in a customer-friendly way as well as selling through mobile devices are the mark of modern customer communication and sales processes.

Whether at the point of sale or in the showroom, whether on the wall or on the counter, the versatile mounting options now provide a place for any tablet.

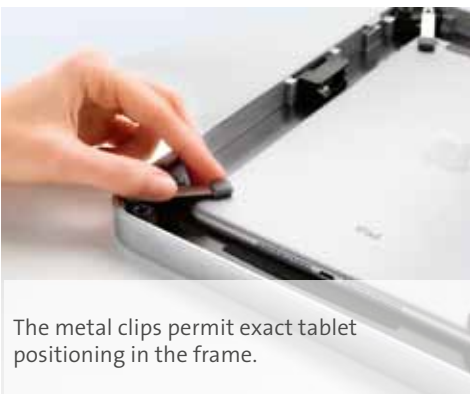

Cleverly designed in every detail.

The TabletSafe or connect plate is securely attached to the connect joint. Perfect cable management hides cables from view. With internal cable routing, the tablet / device can be turned +/- 45 degrees in each direction.

Alternatively the connect joint enables a turning of 360 degrees.

The metal clips permit exact tablet positioning in the frame.

Control functions remain accessible by the practical apertures. If not used, they can be closed off with cover caps.

Unobtrusive and impressively practical: the integrated lock provides secure protection against theft.

The right system for any need.

Knowing what's important to you: our RetailSystem and its components.

2-in-1: Screw-on and screw-through attachment for using existing means of attachment.

High-quality silver- or black anodised aluminium profiles. Cables are routed through the inside of the column where they are concealed by practical brush seals.

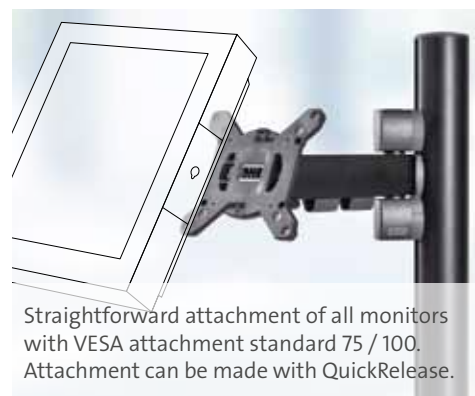

Infinitely variable in height, the arms let you position terminals, keyboards and monitors wherever you choose.

Practical cable holders provide secure, neatly organised cable management on the arm.

Customised mounting options for attaching brand-specific peripheral devices.

Straightforward attachment of all monitors with VESA attachment standard 75 / 100. Attachment can be made with QuickRelease.

Everything in view.
